luyanda.mncube@outlook.com | 061 116 7195

EDUCATION

UNISA - ONGOING

BSc CompSci & Mathematics

Expected grad. 2027 | JHB

WETHINKCODE

2018 | JHB

NSC MATRIC

2011 | JHB - Northcliff High School

CERTIFICATIONS

MCSA: Database Development

DP-203: Azure Data Engineer Associate

DP-700: Fabric Data Engineer Associate

SELECTED HIGHLIGHTS

AI-Driven Notifications

- Burst-detection feature for Thames Water digital twin.
- Combined DS outputs with production DE workflows.

Digital Water Balance

- Models for network-level water movement and leakage estimation.
- Supported regional views across London, Oxford, Guildford, and SWA.

Azure Warehouse Architecture

- Daily PostgreSQL backup and reporting warehouse on Azure.
- Improved resilience and analytical access for operational data.

Water Industry Recognition

- Water Industry Awards UK nomination; Smart Water Networks award.

Patent Data API Cores

- Modelled API cores for patent data used by product and search services.

CORE STRENGTHS

Data platform architecture
Stakeholder-facing delivery
Production data operations
Cloud migration patterns
Analytics enablement

PERSONAL SUMMARY

Senior Data Engineer with 7+ years of experience designing cloud data platforms across Azure and AWS. Experienced in Databricks/Spark, Kafka/MSK, Elasticsearch, and production ETL/ELT systems for client-facing analytics workflows. Strong focus on reliable data movement, dimensional modelling, and scalable platform architecture.

EXPERIENCE

LEXISNEXIS | DATA ENGINEER | PLATFORM & SEARCH INFRASTRUCTURE

Sep. 2025 - Present | JHB (Remote)

- Designed AWS ingestion and serving patterns for production analytics/search systems.
- Provisioned MSK/Kafka and Elasticsearch infrastructure with Terraform across environments.
- Built serverless workflows with Step Functions, Lambda, and RDS for reliable data movement.

Tech Stack: AWS (MSK, Step Functions, Lambda, RDS), Elasticsearch, Terraform, Docker, PostgreSQL/SQL Server, Python, SQL

SAND TECHNOLOGIES (PREV. EXPLORE AI) | DATA ENGINEER

Oct. 2021 - Present | JHB (Remote)

- Designed Azure ingestion patterns for telemetry, geospatial, and water-network data.
- Built Bronze/Silver Databricks models for water balance, leakage estimation, and burst detection.
- Delivered client-facing data products with Azure DevOps CI/CD.

Tech Stack: Azure Data Factory, Databricks, Spark, MSSQL, PostgreSQL, Python

YEBOFRESH | SOFTWARE ENGINEER

Mar. 2021 - Oct. 2021 | Airport Industria, CPT (Remote)

NTT (PREV. DIMENSION DATA) | DATA ENGINEER

Feb. 2019 - Mar. 2021 | Bryanston, JHB

- Built and maintained batch + streaming pipelines for live telemetry and editorial datasets used across TV, mobile, and web.
- Developed core data models (asset hierarchies, metadata) enabling analytics and visualization.
- Provided live race-day support for global events (e.g., Tour de France, Zwift/UCI esports).

Tech Stack: MSSQL, Python, Apache NiFi, Apache Beam, Docker, Bash

COMPETENCIES

Data Modeling:

Azure:

AWS:

Databases:

Programming:

DevOps:

Streaming/Search:

Dimensional modeling, lakehouse, Bronze/Silver patterns

Data Factory, Databricks, ADLS, ADO

MSK, Lambda, Step Functions, S3, RDS

MySQL, Microsoft SQL Server, PostgreSQL

Python (Pandas, NumPy), PySpark, Rust, SQL, Shell

Azure Pipelines, Docker, Terraform, Git

Kafka/MSK, Spark, Elasticsearch, NiFi
